JavaScript	■■■■■	MYSQL	■■■■■□
JQuery	■■■■■□	Nest.js	■■□□□
PHP	■■■■■□	Node.js	■■■■■□
React.js	■■■■■	Laravel	■■■■■

## **Latest Projects**

---

- ❖ **Soren Transport**
  - This project focuses on managing and processing large datasets for carriers involved in shipments between the USA, Mexico, and Canada. The system is designed to handle Full Truck Load (FTL), Less Than Truck Load (LTL), and parcel services, providing efficient tracking, routing, and data organization. Skills are Laravel and Reactjs
  - <https://app.sorentransport.com/auth/login>
- ❖ **IPM module**
  - This project involves the development of a web application for conducting IPM (Integrated Pest Management) every 45 days and PIP Management. The system is built using React.js for the front-end and Nest.js for the back-end, ensuring a seamless, efficient, and scalable solution.
  - <https://www.talentelgia.com/>
- ❖ **Love Justice**
  - This project involves the development of a dynamic, user-centric web application for Love Justice International, a non-profit organization dedicated to preventing human trafficking and protecting vulnerable individuals. The application is built using React.js for the front-end and Node.js for the back-end, offering a responsive and scalable platform.
  - <https://www.lovejustice.com/>
- ❖ **Cause Vest**
  - Cause Vest is a platform designed to facilitate social impact investing by allowing users to support companies that focus on sustainability and positive social change. The website provides a seamless user experience for exploring, investing, and tracking impact-driven portfolios. Built using React.js for the front-end and Laravel for the back-end, this project ensures a responsive and scalable solution for socially conscious investors.
